EDUCATION

Stony Brook University **Stony Brook, NY**
B.S. in Computer Science & Business Management *Expected May 2028*
Awards and Honors: Dean's List, Honors College, Global Excellence Scholarship Recipient
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Software Development, Data Science, Machine Learning, Cloud Computing, Discrete Mathematics, Systems Fundamentals, Theory of Computation.

PROFESSIONAL EXPERIENCE

Software Specialist July 2025 - Present
Division of Information Technology, Stony Brook University *Stony Brook, NY*
- Diagnose and resolve software and network issues for 100+ faculty and students weekly, maintaining a 98% customer satisfaction rate.
- Manage the end-to-end client request lifecycle in TeamDynamix, independently triaging and closing 200+ tickets with proactive follow-ups and communication tailored to both technical and non-technical stakeholders.
- Partner with cross-functional development teams to analyze performance data and UI/UX issues, implementing process improvements that increased positive user feedback by 15%.

AI/ML Fellow May 2025 - January 2026
KPMG
- Analyzed 1M+ records using regression, reinforcement learning, and time-series methods to model AI adoption and energy consumption.
- Developed predictive models achieving 90% validation accuracy and evaluated strategies projected to reduce environmental impact by up to 20%.
- Presented monthly reports and demos to industry mentors and KPMG's sustainability division, improving technical communication and model interpretability.

PROJECTS

Allocora: Cloud Cost Splitter | FinOps Pipeline: Python, Pandas, scikit-learn, AWS/GCP July 2026
- Built a monitoring pipeline that tracks shared AWS/GCP infrastructure performance and cost metrics for multi-team startups, attributing usage via a tagging-rules engine with a pattern-matching fallback for unlabeled resources.
- Designed cascading allocation strategies to attribute shared infrastructure costs across teams when direct resource ownership is unavailable.
- Executed a z-score and isolation forest ensemble to detect anomalous usage and flag potential billing discrepancies.

Food Rescue | Full-Stack: TypeScript, React Native, Swift, Firebase June 2026
- Built a real-time food-rescue marketplace with phone OTP authentication and role-based access for restaurants and NGOs, synchronizing live listings across clients using Firestore real-time listeners.
- Implemented atomic Firestore transactions for donation claims, preventing double bookings and eliminating race conditions during concurrent requests.
- Tested concurrent requests and failure scenarios, including dropped connections, to validate transactional reliability and prevent inconsistent listing states.

LEADERSHIP EXPERIENCE

Professional Development & Recruitment Chair January 2026 - Present
Theta Tau Professional Engineering Fraternity - Zeta Epsilon Chapter
- Conceptualize and lead end-to-end recruitment events for the fraternity, designing event themes and promotional flyers that draw 200+ attendees per event.
- Build and maintain partnerships with 50+ student clubs and academic organizations on campus, facilitating cross-organization communication and joint programming opportunities.

Public Relations Secretary - Executive Board April 2025 - May 2026
Women in Computer Science (WiCS)
- Managed WiCS social media accounts, boosting engagement by 30% in a month through data-driven content strategies.
- Collaborated with Stony Brook University's Career Center to deliver newsletters to 150+ members on the latest tech opportunities.

SKILLS

Languages: Java, Python, C, JavaScript, TypeScript, Swift, HTML/CSS
Frameworks & Libraries: React, React Native, Node.js, Firebase, Pandas, NumPy, scikit-learn
Developer Tools & Platforms: Git, GitHub, Docker, AWS, GCP, TeamDynamix, Expo
